

Environmental Resources Management is contracted to one of HS2's Phase 1 contractors building a section of viaduct and tunnel to the north east of London. We require a sub-contractor experienced in construction noise assessment and permitting to work with us in the contractor's office in Euston, London, and on site, to prepare Section 61 applications, vibration risk assessments, monitoring protocols etc and assist in local authority and stakeholder engagement. The sub-contractor will be supported by ERM office based staff but will be expected to lead the contractor interface and site management. The role is 4-5 days a week, is available immediately, and likely to run through to the end of 2019 and possibly beyond. Please contact Steve Mitchell (Steve.Mitchell@erm.com).
