

Acoustical Investigation & Research Organisation Ltd (AIRO) is a long established specialist acoustical consultancy firm, with extensive laboratory facilities, based in Hemel Hempstead, Hertfordshire. We are seeking applications for the grade of Consultant.

The successful candidate would be expected to become involved with a diverse range of projects including:

- building acoustics,
- environmental noise assessments and mapping,
- sound insulation design and measurement,
- industrial and commercial noise impact appraisals and
- specialist laboratory acoustical measurements.

You will have demonstrated that you can with enthusiasm:

- organize, carry out and report typical consultancy projects with appropriate rigour in an efficient and timely manner,
- prepare accurate and financially viable quotations for the work,
- communicate effectively with the customer and colleagues.

Required qualifications include corporate membership of the Institute of Acoustics or a demonstrably equivalent level of qualifications and experience. Applicants would be expected to hold a full driving licence and a valid CSCS Card in order to carry out site work.

AIRO supports the professional development of its staff via appropriate training and further education. Competitive remuneration and benefits are provided.

Applications including a detailed CV, should be sent to David Watts (Principal Consultant) by e-mail to David.Watts@airo.co.uk or by post addressed in confidence to the Managing Director, Dr Tony Jones, at our Hemel Hempstead office (address on our website www.airo.co.uk). Telephone David Watts on 01442 247146 for an informal discussion about the position.
