

Acoustical Investigation & Research Organisation Ltd (AIRO) is a long established specialist acoustical consultancy firm, with extensive laboratory facilities, based in Hemel Hempstead, Hertfordshire. We are seeking applications to join AIRO's team.

The successful candidates will become involved in the full range of AIRO's technical project work including:

- Environmental sound
- Building acoustics
- Laboratory and on-site testing
- Calibration activity.

At the appropriate level for your qualifications and experience, you will demonstrate that you can enthusiastically:

- work with colleagues to develop your technical aptitude for acoustics,
- engage in the practical aspects of testing including installing test samples,
- organize and carry out typical assignments in an efficient and timely manner,
- communicate effectively with the customer and colleagues.

Required qualifications include membership of the Institute of Acoustics at an appropriate grade or a demonstrably equivalent level of qualifications and experience. Applicants would be expected to hold a full driving licence and to have or rapidly obtain a valid CSCS Card in order to carry out site work.

AIRO supports the professional development of its staff via appropriate training and further education. Competitive remuneration and benefits are provided.

Applications including a detailed CV, should be sent to David Watts (Principal Consultant) by e-mail to David.Watts@airo.co.uk or by post (address on our website www.airo.co.uk). Telephone David Watts on 01442 247146 for an informal discussion about the position.
