

WINCHESTER | LONDON | EXETER

We are looking for people who share our passion for understanding acoustics and implementing that knowledge effectively and meaningfully.

If you want to develop your ability to bridge the gap between the subjective and objective, the science and art to provide high-quality work that is not only functional and meaningful but acoustically phenomenal, give us a call!

What you'll be doing:

- planning and undertaking acoustic surveys
- data analysis, acoustic calculations and technical reporting
- presenting acoustic advice to clients and colleagues
- staying up-to-date on acoustic technology, materials and standards

Who you are:

- an acoustics graduate or professional
- personable with a can-do attitude and a willingness to learn
- looking for a career in an expanding consultancy
- a creative problem solver with a passion for sound
- a team player with excellent written and verbal communication skills
- motivated with a strong work ethic, and a desire to make a real impact

Bonus to have:

- experience in consultancy
- experience with acoustic modelling software (eg CadnaA, ODEON, etc.)

What we offer:

- opportunities for professional development and growth
- a chance to work on projects that push the boundaries
- a collaborative and dynamic environment where your ideas are valued
- competitive salary and benefits package

Fire your CV over to us at mail@clarkesaunders.com, with some interesting facts about yourself and what you think you could bring to the CSA team.

Please note, vacancies are in the London office on Borough Road, SE1.
